

## INVICTA BAKEWARE CELEBRATION CAKE TIN RANGE CARE & USAGE INSTRUCTIONS

Our ranges of cake tins are hand-made from heavy quality 0.48mm tinplate. They are seamed together from more than one piece of metal and, due to the nature of their construction, they are not guaranteed leak-proof.

Do not use sharp implements against the surface of the tins as this can damage the material exposing the base metal, which may cause surface rust.

Our tins are produced to bake cakes and are suitable for use at relevant baking temperatures.

### Important information:

- Care instructions – clean in warm soapy water and dry thoroughly straight away
- Do not soak or leave standing in water as this will cause the tin to rust
- Not suitable for use in a microwave
- Not suitable for use in a dishwasher
- Not suitable for use in a freezer
